Thanks. The HASP didn't get attached.

We have 4 people. Two will need medical screens so we are at the mercy of the FOH clinic. Another is past due on training so I am declining them. I have one that is good on training and medical (respirator qualified – RSC RTFL).

I'm the lead for H&S in R6. The REOC drafted a preliminary HASP, which is attached. However, it is not final, as several additional JHAs need to be included.

Because this is an emergency response under 29CFR1910.120, the minimum training for those responding is the 24hr HAZWOPER training with the 8hr HAZWOPER refresher. If personnel are on the occupational medical surveillance program (OMSP) due to their routine duties, then they need to be current on their exam. If employees are not enrolled in the OMSP, pre-screening and post-screening exams must be conducted prior to the employee deploying into the field.

If you have any questions, please let me know.

Hi Janson and Kendra,

Who is the lead on this issue? I will likely have a few questions about particular qualifications and needs that we need to match up. Is there a HASP? I just want to make sure that we can provide you people to hit the ground running.

I'm double checking those who are volunteering on current training. Is there any specific need on medical?

Thanks

Roy

WERG,

This is a request for availability to support Region 6 in their role as “back-up” to Region 8 in Colorado. Work would include oversight of sampling and assessment of private water wells in Albuquerque, NM, which may have been impacted by a large release of mine wastewater into the upper portions of Cement Creek near into Animas River; San Juan County, CO. Length of deployment is up to three weeks.

Region 6 is asking for 10 people with ability to leave tomorrow. If not tomorrow, when can they leave.

Your availability includes receiving permission from your supervisor, as well as meeting the Health & Safety requirements for Region 7 Deployment. Please let me know of your availability as soon as possible.

Thank you,

Ken
